## EDUCATION

---

**Alva's Institue of Engineering and Technology**

*Bachelor of Engineering in Computer Science and Engineering(CGPA: 8.57)*

December 2020 - Present

Karnataka,India

## OBJECTIVE

---

Seeking an entry-level position in a dynamic company where I can apply my relevant skills and education, make valuable contributions to the company's success, and learn and grow in the role.

## PROJECTS

---

**College Club Membership Management System**(HTML, CSS, JavaScript, PHP, MySQL)

- the project aimed to streamline the activities of college clubs and improve communication between the members, coordinators, and administration.
- The system allows students to join the club of their choice, view details about the club and its activities, provide feedback, and send queries directly to the administration.
- The administration can update club details, and coordinators, and publish notices, ensuring that all members are up-to-date with the latest information.

## ACHIEVEMENTS

---

- Secured Elite Grade in NPTEL exam in DSA using JAVA
- Solved more than 400+ Datastructure problems
- Achieved a global ranking of 157 in the CodeChef February Long 2022 - II Challenge, competing in Division 3.
